Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

Our school district was trying to shutter the last walkable, urban elementary school in Bemidji. The school is about six blocks from my house. I spoke at the school's public hearing along with my neighbors. We succeeded in forestalling the school's closure. This experience has taught me that too often, your zip code predetermines the success of your schools. I will support more uniform funding regardless of the property value of a given school district.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I support the premise of the question:

We need to restore fairness to the tax code. We need to fund a new "Minnesota Miracle"!

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

I will defer to the wisdom of ED MN on this. I do not know enough about the subject of standardized testing to offer a cogent opinion.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

I believe in a library patron's right to read books they want to read. And I believe that libraries ought to have a wide variety of books. I remember reading books in my junior high library that were a little risqué by the standards of the late 1980's. I am thankful our librarians and school administrators did not unnecessarily restrict us from reading these books.

I believe properly funding libraries and having skilled librarians working will go a long way to protect student access the books that deal with subjects that are challenging or taboo to minority, if vocal, community members.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

I support increasing the states capacity for mental healthcare. I would support laws barring immigration actions from taking place at schools or childcare centers. I am not and educator nor a therapist. I would look to you and mental health professionals to suggest the best way forward.
