Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

I visited Hibbing High School and the High School in Lindstrom MN. I was struck by the obvious difference in funding between rural schools and Twin Cities schools.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I support changing the formula for the distribution of the Permanent School Fund to a per-school district formula to enhance funding for rural schools. Also, I support measures to allocate vacation home taxes to the public school district where the 2nd home is located.

I also support the 1% tax on wealth exceeding 10 million per couple and the fifth tier of income taxes assessed at 10%.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

Individual education decisions should be made by the student, parents, and teachers, based on the overall recommendation of the educators.

I believe standardized testing was a move to weaken the public school system and diminish the power of teachers' unions and respect for the professional ability of teachers.

Testing is a measure of a student's ability to pass a test designed for the cultural norms of the most powerful culture. I believe student progress is best assessed by the educators who can fully evaluate their performance, understanding, and mastery of a subject. I believe standardized tests measure their ability at a particular moment in time to prove the temporary memorization of specific parts of a subject. This is not the same as understanding and knowledge.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

I am opposed to the banning of books. I believe if parents do not want their child to read a particular book, perhaps the student could be allowed an alternative assignment if it's a required book. Otherwise, parents should watch their own child's library selections and keep their nose out of decisions other families make regarding appropriate reading material.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

This is an incredibly sad question to have to answer. I believe students are going to need emotional, financial and practical support to return to a sense of normalcy in order to focus on their educational needs. Frankly, I am not sure what that looks like. I could be interested in learning about specific proposals to meet these needs. I strongly believe that education has been the most direct route to the middle class for immigrants and people experiencing poverty. It is tragic to have large swaths of students for whom education has become more difficult to obtain. Quality education for all is one of the most basic promises of America and we need to find a way to continue to fulfill that promise.
