Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

I have visited most of the schools in 742 through my role as a school board member, and as a parent of 3 girls attending elementary and Jr. High.

I believe I have a lot of insight and knowledge gleaned through my 8yrs of service on our local school board, from financials to curriculum, and everything in-between, including having had to deal with literal threats from parents and community members during COVID and through other "contentious" issues.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I served during the 2013/2014 legislative session when we created the 4th tier income tax bracket; I believe we still have options for additional brackets.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

I believe test scores are simply a "snap-shot" of how that student performed on that test, on that day, at that time, and that this is only one tool to measure how well our students are doing; I do not believe test scores should be the primary driver of decisions.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

I support any measures that would allow for our students to easily access age-appropriate reading materials; I trust our teachers to help our students learn and gain knowledge from so-called "controversial" materials.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

I believe our schools should be free from any type of interference from outside forces and influences, and would support any necessary tools/supports/programs to make sure our schools our welcoming places; I know quite well that, for some of our students, school is indeed the safest place they spend their time, including, sadly, their own home (or lack thereof).
