Yes

Q12. Efforts to address college affordability in the last two decades have resulted in 120% growth in the State Grant Program. One consequence of this high tuition/high aid model has been the chronic underfunding of the public college systems. Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

Sibley East High School. School Board Meeting. Working with the school board to secure funding and expand education opportunities including extra circulars such a swimming pool

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I believe we can raise the corporate tax to be closer to past rates (like in the 70s/80s). Close tax loopholes for big corporate organizations so they're paying their fair share. If that were done properly, we could afford to cut lower and middle class taxes and still have properly funded education.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

Standardized tests are a tool in a tool box - You can't use a hammer to saw down a tree and you can't measure a board with a flashlight.

Positives: Quick overview of what kids know and don't know. Its fast and easy, low admin testing, though the positives really stop there in my opinion.

If funding is dependent on good scores, doesn't that mean the schools struggling probably need the money the most are going to get even further behind otherwise? Testing will show that low income and ESL kids will test lower, so affluent and less diverse areas will test higher, creating an even larger racial and economic disparity than we already have. Then in turn more families will choose to open enroll in neighboring districts because of test scores and things snowball after that.

Standardized Testing can have its place, though I don't think it should be tied to funding in the way that it has been.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

I would oppose legislation that aims to hinder or limit a student's ability to potentially learn more about themselves through books that they never would have had an opportunity to learn about otherwise. Keep politicians out of the classroom and let teachers teach.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

I would work with schools and local officials to ensure they are not cooperating with ICE and work to make it illegal for them to cooperate with ICE and/or for federal immigration officers to come within certain distance of a school. If possible, provide trainings with faculty and/or students and/or community on what to watch out for and to not let unknown people into the building.
