Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

Zumbrota-Mazeppa. I have served on the ZM school board for the last 10 years. I recently completed my yearly walk through with the principals at the primary and elementary schools. Also, my youngest son just graduated from ZM in 2026. My observations during my yearly walk through were that the students are very engaged with what the teachers are teaching and the kids seem to be happy. The experience on the board and as a parent of a recent graduate showed me the state needs to stop moving the goal posts for standards in education and we need to look at a different metrics besides test scores to base education on.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I agree with restoring fairness to the state tax code. In addition, I think we need to take a hard look at the state budget and decide what are needs vs wants and allocate funds appropriately.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

I believe that no decisions can be made with standardized testing because parents are now allowed to opt their children out of taking these tests. Without evaluating every student in a grade level, broad based decisions should not be made.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

We need to ensure that we fight back and make sure that the diversity in books is available. Also, local districts should be able to decision with the librarian/superintendent/principals on what books will be available.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

I would try and find more funds for the schools to allow the schools to bring in social workers or counselors for a short period of time to allow for recovery.
