Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

Century High School

It was a great experience and I'm grateful to the teacher who welcomed me into their classroom. I'm always struck by the excitement, thoughtfulness and engagement of young people. I heard from the students that they have concerns about their future, the environment, our democracy and gun violence. I also heard they want to be engaged in the solutions and are frustrated when they feel like adults dismiss them or don't listen to them.

I heard from teachers that they are worried about the challenges their students are facing, rising health insurance premiums and being able to retire at a reasonable age.

I'll use this and all future interactions with student and educators to inform my work in the legislature - sitting on the Education Policy committee has presented many opportunities to take those important perspectives into account as I make decisions.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I fully support raising revenue on the wealthiest Minnesotans and corporations.

I support a 5th tier to our income tax system.

I support closing loopholes in the tax system like tax breaks for airplane parts and luxury sports seating.

I support eliminating tax breaks for data centers.

I support a social media tax on giant wealthy tech corporations like Meta.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

I believe standardized test scores could be used carefully and broadly for trending and as one piece of many types of information - but I'd caution us to make too many decisions based on them. I'd also support changing the policy so that students who don't take the tests are not recorded as "zeros" in those results.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

We have done some work on this front and need to protect it. We should continue to protect educators and schools to provide a wide variety of books for students that reflect our history accurately and allow kids to see themselves in the pages. I expect we'll continue to see attacks on this from the federal level, we need to be very clear about upholding these rights at the state level.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

We need to recognize the trauma from Operation Metro Surge will be long-lasting. We need to increase access to mental health resources for students and educators and when we have the votes to do so, we should pass the ICE accountability legislation that was passed out of the Senate which includes prohibiting federal agents from entering schools without the proper warrant and codifying Plyler v. Doe to ensure every Minnesota child has access to a safe public education.
