Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

I have been to Buffalo High School for events for my friends kids and Buffalo Middle School, Monticello Middle School, and Discovery Elementary for DFL events. As well as Monticello Middle School to see some of the school board meetings. I have seen first hand how extracurriculars such as theater, art, music, and sports have impacted the kids I know in positive ways. Having a great book education is absolutely necessary, but extracurriculars add a depth to a kids growth as well.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I support ensuring that the wealthiest corporations and Minnesotans pay their fair share of taxes. I support closing excessive tax loopholes and overall simplifying the taxation process so it is fair to everyone. Currently, those with extra means also have the ability to hire experts to find them more tax breaks and work the system, while the average Minnesotan would not have the extra money to do that nor the time to find it themselves.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

I don't know all the pro's and con's of standardized testing, but some of the teachers I do know talk about how much they dislike them. I also worry about education being focused on gaining higher scores on standardized tests rather than focusing on ensuring children are fully educated. From what I do know about them, I think the scores should be used internally to gauge if changes need to be made to instruction style or find areas that children are having a harder time grasping, but it should not be used to determine funding of any kind.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

All kids should have access to any age-appropriate book available to them. Librarians are the ones who are the best equipped to determine what content is in books and make determinations on age-appropriateness at a community level. I think they should be the ones making the determination on that and if there is a disagreement on a decision it then I think there should be a process to solve that. This process should go to a body made of librarians from across the state to determine if the decision made was correct or not.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

We need to make it clear in both word and action that we will keep our schools, educators, and students safe. While individual, ground level actions did a lot to help those hurting from Operation Metro Surge, the state did not. We need to ensure those that were impacted by it are helped back up and put in laws and policies to ensure that this doesn't happen again. Immigration as a whole is a civil issue and should not be enforced by a para-military force with no checks and balances on their actions.
