Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I believe schools are the foundation of community prosperity. We need stable, equitable funding. I'm not wedded to any particular revenue mechanism. But I do think it's worth examining whether our current reliance on property taxes is fair, especially to working families. If reviewing corporate tax structure, closing loopholes, or adjusting how we tax the highest earners delivers sustainable school funding without shifting burden downward, I'm for it.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

Test scores can flag learning gaps and help identify where students need support. But they shouldn't be the only measure driving consequential decisions. A single test score shouldn't determine whether a teacher keeps their job, whether a school gets resources or closure, or whether a student gets tracked into a particular path. Schools, teachers, and families who know these students should interpret results in context – alongside attendance, engagement, writing, projects, growth over time. Tests are data. They're not destiny, and they're not judgment

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

Parents should absolutely have a voice in their children's education. That's different from deciding what books are available to other people's kids. I trust our librarians and educators. They're trained to curate age-appropriate collections that reflect the world students actually live in. When parents have concerns about specific books, there should be a clear process to discuss it. But removing books because they include LGBTQ+ characters or address racism isn't parental involvement, that's censorship. We need diverse perspectives in schools, not because we're pushing ideology, but because students deserve to see themselves and understand the full complexity of the world they're inheriting. That's education, not propaganda.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

When federal immigration enforcement creates fear in our schools and communities, students can't focus on learning. Teachers are managing trauma instead of teaching. Families are afraid to access services. Schools should be safe places, and educators need resources to support students and families affected by this kind of disruption. That means counseling support, financial assistance for families experiencing economic hardship, and clear policies that schools are places of learning, not enforcement. We should also make sure our school staff understand their obligations under law while protecting student safety and dignity.
