Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

I visited both Johnsville Elementary School and Centennial High School. At Johnsville in particular, I was able to spend a lot of time talking with educators. It is clear that our educators are feeling burned out and that they need more support from administration.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

There are several potential options for raising the revenue necessary to support our schools.

1. Expanding the sales tax base by eliminating tax expenditures that disproportionately benefit wealthy corporations and individuals.
2. Some form of tax on social media companies.
3. Updating our tax code to ensure our public goods and services can be supported by the wealth generated by the AI economy.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

Standardized tests can be one data point in a broader evaluation of a teacher, school, or district. They should be one piece in an assessment puzzle. However, there are other evaluation methods that should be incorporated as well like portfolios of student work, peer evaluation, and exit interviews with randomly selected students.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

The ban on book bans we passed in the 2024 legislative session is a good start. We should look at passing additional protections for teachers and librarians to exercise their professional judgment, and we must provide MDE and the Minnesota Department of Human Rights any tools they need to enforce existing law on this subject if school boards threaten not to follow them.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

There are several steps we should take. First, we need to take care of the physical needs of those impacted, like the \$40 million in rental assistance we passed at the Capitol this year. Second, we need to care for the emotional needs of those impacted. Expanding access to mental health services, especially in our schools, would benefit those affected by Operation Metro Surge and students and educators more broadly. Third, we need to take action to ensure something like Operation Metro Surge never happens again. That includes passing legislation that would prohibit federal immigration authorities from operating in and around schools.
