Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

Coon Rapids High School. I saw amazing teachers with not enough resources.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

Tax AI and social media companies — they are some of the wealthiest companies in the history of the world while causing tremendous uncertainty in our society, and in the case of social media companies, harming our mental health.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

Standardized tests can provide some useful information about performance, but are just one data point and should never be the sole measure of success. Test scores can help identify students or schools that need additional support or where there may be opportunity gaps. But they can't effectively measure important things like critical thinking and creativity. These scores should help inform decisions, not dictate them. And we need to rely on the expertise of our teachers and educators who work directly with students every day.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

I don't support banning books or removing them from school libraries, and I was proud to support our prohibition on book bans in 2024. I would support additional legislation if needed in this area.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

Operation Metro Surge was devastating for students, their families, our educators, and our schools. We need to make sure students and their families have the mental health support they need, including funding through Student Support Personnel Aid.

We should also work in partnership with our schools and educators to ensure that students can recover from classroom time that was lost and that our schools aren't financially punished due to Trump's retribution campaign.

Finally, we should ensure this can never happen again by banning ICE from our schools. Using kids as bait to get to their parents is barbaric.
