Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

Rockford High, held Q&A with staff. They shared some fantastic programming and support they are offering to students. These programs are in danger of being cut due to ongoing cuts from the government.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I'd like to look at closing common sense loopholes, such as charging a sales tax on pro-sports suites. In addition, I'd want to explore additional tax brackets as the current system stops increasing tax responsibility at \$300,000/yr.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

Standardized test scores tell us a lot about a districts needs for support. I absolutely do NOT support removing funding if scores are low. We need to see lowering trends as a call for help and additional support in terms of programming to engage students and offering resources to educators.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

Banned books are unacceptable. And historical accuracy in our schools is paramount in supporting forward progression in our democracy. Legislation needs to protect history and the truth in our schools: that slavery was an abomination that led to centuries of continued racism and systemic barriers to growth for people of color. It's never gone away, it has only shifted with the changing world.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

In a perfect world, we would hold the federal government accountable for the damage they caused, in the form of funding to support additional programming and resources. I'm not confident that will happen, and we need to move faster than that. Next legislative session will be a year after the surge began. I would have supported the proposed legislation to ban law enforcement from concealing their identity, and similar policy.

We need to provide additional mental health resources to families and staff, as well as pour into community-building programs that help people heal, continue to unite, and build a ever-growing coalition against human rights injustices. Building community is almost always the answer, and I believe the government fails at times to engage in the most important part of our state: the workers, families, and unique communities. If we don't engage and listen, we will never find the answers.
