Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

Wayzata High School. I was there for an event honoring a student. Wayzata is looking to expand their school facility. The students there have an excellent education program and I will continue to support and advocate for all three of my districts.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

One thing we need to pass is the social media tax. we were unable to pass the wealth tax that would have instituted the nations first state level annual 1% tax on wealth exceeding \$10 million. We should look at passing that next year, as well as the possibility of a fifth tier income tax bracket.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

I think test scores should be used to determine which schools and which students need additional supports for their success. While I agree test scores are a metric to assess the efficacy of our education system, it is not the only metric and likely not the most helpful.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

Individual parents can decide what materials they want their children to read, but they should not make the decision for other families. Our kids have a right to access truthful and accurate information without interference. Any attempts to ban books should be fought vigorously.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

We need to continue to prioritize funding for mental health supports in our schools. The challenge is always funding for all of the things that we believe our education system should include.

We need to ensure that federal ICE/CBP agents are not permitted to enter school property, or hover near schools. And the state should pursue lawsuits against the federal government for the cost of Metro surge on our communities.
