Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

I volunteer (and have been a volunteer for years) at Plymouth Creek Elementary in Plymouth. I am so impressed by the affirmative messages I see on the walls, but also in the classroom and office. I love being there; I see first hand the impact of one-on-one help for students needing extra help, and since I stay for lunch (with my grandkids), I am able to see how important school meals are to students. I also see first hand how hard the teachers and staff work, and the amount of personal investment teachers make in their classrooms.

My parents were public school teachers, and my daughter works as a speech therapist at Buffalo schools, so I already feel very strongly that our public schools are doing a great job and need more investments.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I think every school should be able to raise money for capital investments. I support local referenda but also additional state support so that schools with lower property tax and housing values can have equitable funding opportunities.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

I do support minimum standards. I trust teachers to tell me how standardized testing does or doesn't work.

I support individualized programming and targeted help based on aggregate test scores for schools that are in lower performing areas.

Equitable is not the same as "fair", and standardized test scores can be used to determine where schools need more financial and personnel support.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

Teachers and media specialists should be trusted to provide age-appropriate media for students. Students should be allowed to read current books and media that reflect our society's values today. That includes rights and freedoms for the LGTBQIA2+ communities.

One parent should not decide what someone else's children have access to or read.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

I support continuing to provide online and remote learning for students who are afraid to go to school in public. I wonder if food support can be provided (I learned in the Minneapolis report that many school meals went uneaten during Metro Surge).

Extra support must be provided to teachers who are facilitating home learning (we tried to do that in the MN Senate).

Somehow, we should provide additional counseling and trauma relief for those who were (and continue to be) impacted by ICE and the federal government's harassment.
