Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

Minnetonka High School

I was at the school to be interviewed by a class of students in their Vantage Program that focuses on Public Policy/Politics. Since my kids are no longer in the K-12 public school system, engaging with these students helps to see what some of the new programs are and how students are learning today.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I agree that everyone should pay their fair share of taxes. In my district there is a lot of people who have homes here in MN and in another home in another state where they claim residency to prevent paying Minnesota taxes. I think we should be looking at ways to capture partial residency revenue.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

I need to learn more about this subject to make recommendations. One area that may be indirectly related is open-enrollment. While I appreciate that having choices around what school to attend is important, I also think that some of our districts are being negatively impacted by open-enrollment. There are districts where 40% of students open enroll in, or out, and that has ripple effects that should be analyzed.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

I do not support banning books from public school libraries and would rather see districts allow individual parents the right to read and monitor books they do not want their children to have access to.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

Great question about an important issue! First I would ban ICE agents from school grounds, hospitals and day care centers! While it may not fix the trauma that has already been caused it would allow us to better protect students in the future! I would love to learn more about other ideas for how to address the trauma caused by Metro Surge and can imagine that additional mental health resources would be helpful.
