Yes

Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

I haven't had a chance to visit any schools yet. With the end of the school year being a busy time for them and my niece graduating and helping my sister, I haven't had time yet. It is on my list to set up meetings with several in my district. Carver Elementary, Woodbury Middle, Woodbury High, Math & Science Academy, and Woodbury Leadership Academy.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I support the legislation to create a fifth tier of income tax on the ultra-wealthy in Minnesota. They should pay their fair share, especially as income inequality continues to rise. I'm open to other progressive taxation policies, and would be happy to work with Education Minnesota members and leadership to introduce more progressive taxation policies to keep Minnesota's priorities funded and sustainable.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

Standardized testing can be useful in giving us some data on student performance, however it does not give a whole picture of student learning, and is often neither a fair nor accurate measure of student success. School should be about so much more than how well any student does on one or a series of high-stakes tests. If we let testing be the primary driver of education policy, we risk administrators forcing teachers to teach to the test, rather than learning more meaningful skills. We also know that there are disparities and gaps already, let's stay focused on solving those problems rather than tweaking the tools that measure them.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

Book banning is wrong. Students should be able to access information, and school media specialists should have the freedom and judgment to decide what is appropriate for our kids and our libraries, not whoever makes the most noise in a local school board meeting. I'm open to working with Education Minnesota on creating legislation to protect our students' freedom to learn.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

ICE's actions in our communities have been incredibly disruptive and harmful. We need to get our students, teachers, and staff the resources, training, and support they need to respond to the trauma caused by ICE, and help our students and their families when they are dealing with the aftermath of ICE enforcement actions. I'm open to working with Education Minnesota members and leadership to figure out what the specific needs are, and then working to address those to make sure our approach is effective and comprehensive until this insanity stops.
