Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

I have visited Richfield STEM and Richfield Middle School in the last year. I am consistently impressed with our schools.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

As a member of the Taxes committee, I have worked on several bills to increase revenue in a progressive manner. I support creating a 5th tier income tax for the wealthiest Minnesotans. I also support and have authored legislation to close corporate tax loopholes that can raise significant revenue. I also believe we should look at the corporate business property tax as a source of revenue, especially for larger businesses.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

Testing can have a place to measure growth of students, but it is just one point of information for educators. We should not be making broad, funding based decisions based on standardized testing.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

This is one of a growing list of areas where we do not need the federal government telling our educators and schools what to do. We need to use our levers at the state level to protect Minnesota students' freedom to read.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

Our community was at the center of the federal occupation with significant consequences for our families and students. I saw first hand how teachers and our schools became a first line of defense and support in ways that inspired such pride. At the same time, this has created additional trauma not just for families and students, but educators who care so deeply about their students. At this juncture, the most important thing we can do is listen to educators and work to assess what the complex needs are, and where there are gaps in support. We need to be eyes open that the recovery from Operation Metro Surge will be long, ongoing, and require intentional investments and work to support educators and our community.
