Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

In addition to regularly visiting my kids' schools (Oak Grove Elementary and Early Learning at Washburn in Bloomington), I've also visited Kennedy and Jefferson High Schools, Oak Grove Middle School. The best part was being able to hear directly from students and staff about their experiences, particularly as a result of Operation Metro Surge. I think my biggest takeaway is that students and staff know what they know and they know what they need. If we listen to them and focus on that, we can make things better.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I mean, short answer is tax the rich. We need to look at taxing unrealized income in a much more intentional way. I also personally think we can make property taxes more progressive. Finally, while sales taxes as a whole are generally regressive, we can target them in a progressive way - for example, a sales tax on clothing over \$150 would bring in close to \$100 million more per biennium.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

Honestly, not many. I've experienced this with my own child, too. I think trends are maybe somewhat useful, but when we have significant percentages of students opting out, they just don't tell us much beyond how well a student was able to take a test that day.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

Continuing to protect our ban on book bans is an important start. To the extent that we can further strengthen policies in that vein, I would absolutely support doing so.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

We can start by codifying what is already case law - that every student has a right to an education regardless of immigration status, and by protecting our K-12 schools, colleges, and universities in state law from warrantless ICE actions. We also need to ensure that the Trump Administration's assault on us by ICE/CBP does not continue by resulting in further lost funding for schools. The State needs to step up and make our schools whole.

Since I have a little space, I do also want to clarify my answer to the second question under "Higher education". I don't support direct state funding for private colleges/universities, but I don't support prohibiting other forms of state funds (State Grant, other grants through OHE) from going to support students at private colleges. I do think we need to fix how private colleges disproportionately benefit from the State Grant (and absolutely remove *for-profit* colleges from it), and my priority will always be our public institutions. I just wanted to add that bit of nuance to this answer.
