Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

I have visited many of the schools in my district. In fact, I think I visited all of them both an observation, and also meeting with teachers and administrators on a regular basis. I also I'm quite involved with afterschool activities at Rosemount high school

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

Yes, definitely looking into the income tax of the even the half percent in Minnesota of the Renner's. Also looking at some of the tax loopholes when they equity strip the real estate they own that's another way that I think we might be able to get some revenue. As a committee member of the tax team, we keep looking at new ways to help fund our education.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

I don't wanna make this statement sound like I'm avoiding the question but I really come full circle on testing. I would like to see what teachers think about getting rid of it or developing a system that actually works that does not cause stress to our students and does not disrupt our teaching

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

I believe that teachers have the background and the knowledge to determine what is age-appropriate and what they should use in their classrooms. The state should really stay out of this part of education and really let the teachers have the autonomy to decide what should be used in their classrooms.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

Much like we did with Covid we're gonna have to send in classroom support and bring in some sort of plan. I just don't see us getting the funding until Washington changes over so that's gonna be problematic but we will see what we have in the state available and make sure that we can send some money to the classrooms. We can always find money when we need it. This is so important.
