Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

I have been to Century Middle School and both Lakeville North and South this year. As a graduate of the Lakeville school district, I plan to use my lived experiences and those of current staff and students to guide my decision-making in the legislature.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I support progressive taxes like income taxes and novel corporate taxes like the Data Sales tax. taxing corporations when they sell the data of Minnesotans.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

I think standardized test scores paint an incomplete view of how our students are doing. Some students excel at tests, some excel at homework, and vice versa. Some careers will look much more like tests, and some more like homework. I think these tests can play a role in assessing students, but they must be part of a holistic view of our students' struggles and successes.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

I support the ban on book bans passed by the DFL trifecta. And I think that banning any books based on characters having protected characteristics should not be allowed at the state or local level. Children are people; they may not be old enough to manage all their rights themselves yet, but they still have those rights, and that includes a right to learn about the world, not just a curated version of it. Children are neither the state's nor their parents' property.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

I think we need to provide mental health services to all affected parties. Minnesotans need to support our neighbors and certainly financially support those who have been affected. This isn't just a thing we need to do out of kindness, but this has a direct relation to the education of our students. We know that two of the biggest factors in student success are their mental health and the financial health of their families. Ice agents should be banned from all school property in the state, and the federal government should be made to pay restitution to our communities.
