Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

Since beginning my campaign I have met with the Superintendents of New Prague, Northfield, Farmington, Randolph, Farmington and Cannon Falls to learn about the needs of the individual districts I will serve. I have also been to my grandson's school to read (Farmington schools).

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I'm in full support of making sure every Minnesota student receives an equitable education, regardless of zip code. Raising revenue can take many forms, and the constitutional amendment allowing for a higher percentage from land grant income being allocated to public schools is a great start. Adding a new tax tier (\$1M in wages and above) in our state code is also a means of raising revenue that I think should be explored.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

Any decision regarding the educational system in Minnesota needs to be based on many factors, including but definitely not limited to test scores. There are so many other factors to involve in the decision making process, including Socioeconomic status, English Language Learners, Special Education, Grad rates, Students mobility, etc. Test scores are one out of many metrics to use and should never be seen as the sole method of judging school success or need.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

Students should have access to a wide variety of reading material that is age appropriate. This starts with making sure there is a dedicated media specialist working with students and schools. Censoring materials based on pressure from special interests doesn't help student achievement and doesn't develop adults who treat each other with care and respect. While legislation to protect freedoms within our public libraries can help ensure a wide variety of reading material that reflects our society, it also takes strong leaders in each building and district who stand up to the big money groups and politicians bringing politics into student spaces.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

Our students who have been impacted by Metro Surge have faced incredible emotional strain. Our schools can help our kids heal, but training for teachers, increased levels of participation by School Social Workers and other emotional support staff, and protection from federal law enforcement entering and lingering in and around our schools must be pursued. The federal government should pay for the damages that they caused to our kids.
