Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

North Trail Elementary. Two of my children attend this amazing school in district 192. All of the staff members are friendly, inviting, and committed to student success. I was a PTO President during the COVID year. I fully support educators and the money allocated to the general fund and programs need to be expanded to recruit/retain highly qualified staff and allow schools to purchase resources to teach the wide spectrum of students in schools.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

The top marginal tax brackets need to be adjusted while closing high income loop holes and align capital gains taxation with wage income. This will provide stable statewide funding that is not directly tied to local wealth.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

The driving principle is appropriate use of test scores. The data can be helpful in assisting with identification of students that need both interventions and enrichments. The scores can be used to inform instructional planning, monitoring student progress towards grade level standards, guiding conversations with families about student learning, and evaluating effectiveness of interventions over time. Tanking schools and teachers solely based on scores with no context only widens equity gaps in our schools.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

Transparency in our schools starts at the top. As leaders in the community, there needs to be an awareness of what library resources are available to all our stakeholders and have objective rationale provided to all stakeholders. Perception is reality and it is the responsibility of school and district leaders(including school board) to frame student diversity and resource diversity as a strength and not a shortcoming.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

This is a big question that impacts thousands of people, including myself. There needs to continue to be a push to invest in trauma-informed schools with quality training for educators and administrators. I will advocate for retention incentives for high impacted schools, fund professional development on culturally responsive teaching,. There needs to be targeted funding that is not just a one time relief. Extended learning, family outreach, attendance recovery, and credit recovery need to be top priorities.
