Q26. Do you support clarifying and strengthening workers' rights and protections in the paid family medical leave program?

Yes

Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

I have visited several public schools within the past year. I went to my children's school, Riverview Elementary school, numerous times for parent observation day, for concerts, and to help out as a volunteer school patrol person during Operation Metro Surge. My wife works as an ESL teacher at Harding High School, and I visited her school several times for school fairs and cultural festivals. Through these experiences, I can do fantastic things with limited resources, but that they need more. Teachers and staff need more prep time and support to be their best selves for students.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I support creating a 5th tax bracket for individuals, and increasing the top corporate tax rate.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

Standardized tests can have individual benefits, such as identifying students in need of additional support. On a system-level basis, they can be useful in identifying broad trends among schools. However, standardized test scores should not be used to evaluate teachers, be used in any teacher compensation, or impose any negative consequences on the school. Standardized test scores are one data point among many, and should not be overly emphasized.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

There should be statewide laws that do not allow individual school districts or individuals schools from removing books because of political messages or perceived political messages within those books.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

This is a great question. I volunteered daily with my kids' elementary school in their response to Operation Metro Surge. I met often with teachers and the principal to talk about the situation, and heard about the devastating effects it had on kids, both those who choose to stay home due to fear of deportation, and those that thankfully did not have to make that choice. In addition to a permanent increase in funding that all schools deserve (for a number of reasons), I think a short term injection of money to pay for a large increase in available mental health counseling for any school effected for the next 3 years would help deal with the immediate trauma from the event. These funds should be available statewide, but with a special emphasis on the schools with larger percentages of immigrant and ESL students.
