Q1a. If yes: Which one? What were your observations from your visit? How will this experience inform your work as a legislator?

Yes, Andover Elementary School.

During my visit to Andover Elementary School, one of my main observations was the challenge schools face in having enough funding and resources to meet the needs of every student. I saw dedicated educators doing important work, but I also came away believing that we cannot continue asking our schools and teachers to do more without giving them the resources they need.

As a legislator, this experience would reinforce my commitment to stable and adequate public-school funding. I want more education dollars reaching classrooms, support staff, special education, and the services students need to succeed. I also believe we must listen directly to teachers, school staff, parents, and students when making decisions at the Capitol.

Q10. Education Minnesota believes in restoring fairness to the state tax code by raising revenue from the very wealthiest corporations and richest households and reducing the reliance on local levies to fund schools. What progressive, equitable ways to raise state revenue do you support?

I support closing unnecessary corporate tax loopholes and ensuring the wealthiest corporations and households pay their fair share. This would provide more stable funding for public schools while reducing reliance on local property tax levies and protecting working and middle-class families.

Q15. What individual or system-level decisions in education do you believe are appropriate to make based on standardized test scores?

Standardized test scores can be one tool to measure student progress and identify areas where schools may need additional support. However, they should not be used alone to judge a student, teacher, or school. Decisions should consider multiple measures, including classroom performance, student growth, and educator input.

Q16. Most educators believe students should have access to a wide range of age-appropriate books that include relatable characters and situations that reflect the diversity of Minnesota families. However, certain politicians and big money groups are trying to remove books from school libraries across America, particularly books with LGBTQ+ characters or those that deal with racism in America. How should Minnesota protect its students' freedom to read?

Minnesota should protect students' access to age-appropriate books and support educators and librarians in making professional decisions about school materials. Parents should be involved in their own children's education, but books should not be removed for everyone simply because some people disagree with their content.

Q27. How would you support schools, educators and students in recovering from the trauma and financial impacts that Operation Metro Surge inflicted upon our state, especially BIPOC communities?

I would support targeted funding to help schools recover from the financial and educational impacts, including mental health services, student support, and resources for affected educators and families. We must also ensure every student feels safe attending school, regardless of their race, background, or immigration status. Operation Metro Surge significantly disrupted attendance, student well-being, and school operations, according to Minnesota school leaders.
